

Table of Contents

William Colburn 1956 First Telemetered Rocket.....	3
A Front Note on Safety.....	11
Forward.....	13
Chapter 1 - Introduction.....	15
Definition:.....	15
History:	15
Principles:	16
Tank and Feed System:.....	16
Motor Casing and Solid Component:	17
Injector and Valve:.....	17
Nozzle:.....	17
Igniter:.....	17
Chapter 2 - Physical Configuration of a Hybrid Motor	18
The Valve/Injector	18
Fig 1: An Injector with valve in the closed position.....	18
Fig 2: The Hybrid Injector/Valve in the Open Position.....	19
The U/C Valve as Injector	19
The Forward Closure or Bulkhead.....	19
Fig 3: A typical physical arrangement for a hybrid motor.....	20
The Case Insulation	21
The Solid Grain.....	21
The Motor Case	22
The Nozzle.....	22
Chapter 3 - Numerical Calculations for Hybrid Design	23
Common Equations.....	23
Density Values.....	26
Chapter 4 - A Practical Example in Design.....	28
Fig 4: Inverted gear grain Shape.....	31
Chapter 5 - Hybrid Grain Design.....	32
Fig 5: Phantom view of an inverted gear grain core.....	32
Fig 6: Dimensional Drawing to define the inverted gear grain in Fig 5.....	33
Fig 7: Representation of the Multi-Perf and the AMROC Style Hybrid Fuel grains.....	34
Fig 8: Multi-Perf Grains Before and After Firing.....	35
Fig 9: Double D Grain	35
Fig 10: Bundled Tube Simulation of AMROC Type Core.....	36
Chapter 6 - Hybrid Motor Injector Design	38
Fig 11: Injector Test Setup.....	40
Some speculation on injection	40
Vortex Injection	41
Combustion instability and remedies.....	41
Chapter 7 - The Choice of Fuel.....	43
Historical Fuels.....	43
Current Fuel technology	44

Chapter 8- The Ignition System.....	44
Fig 12: Hybrid Motor Ignition Schemes.....	45
Fig 13: Laser Initiation of a Hybrid Motor.....	46
Fig 14: Direct Laser Initiation of a Hybrid Motor.....	47
Fig 15: Simple Safe/Arm for Motor Ignition.....	48
Fig 16: Hypertek Ignition Scheme.....	49
Fig 17: Oxidizer Pyro Valve.....	49
Hybrid System Sequencing.....	51
Chapter 9 - The Motor Case.....	53
Fig 18: Diagram for Derivation of Strength Equations.....	54
Fig 19: Tank and Motor Case Construction Methods.....	57
Fig 20: Typical Pinned Closure.....	58
Fig 21: Ring Closure Retention Methods.....	58
Fig 22: Depiction of the “Y” Joint Concept.....	59
Chapter 10 - The Nozzle.....	61
Fig 23: Gas Velocity Profile in a DeLaval Nozzle.....	61
Fig 24: Nozzle Ratios.....	62
Fig 25: Eductor Scheme for Simulating High Altitude Firing Conditions.....	63
Fig 26: “Standard” Nozzle Profile.....	63
Chapter 11 - System Assembly and Integration.....	67
Fig 27: Man Rated Hybrid Propulsion System.....	68
Chapter 12 - Testing.....	70
Fig 28: Basic Hybrid System Test Stand.....	71
Chapter 13 - Random Thoughts on Hybrid Propulsion Systems.....	73
Chapter 14 - The SORAC Project.....	77
Fig 29: The SORAC Sounding Rocket on the 58 foot Baxter Launch Rail.....	77
Fig 30: SORAC Sounding Rocket Liftoff.....	80
Appendix A.....	83
Glossary of Common Rocketry Terms.....	83
Appendix B - Oxidizer Characteristics.....	89
Appendix C Fuel Characteristics.....	93
Fig 31: Oxidizer/Fuel Ratios.....	93
Fig 33: Additive Properties.....	94
Appendix D - Materials.....	95
Fig 34: Material Properties, Case and Tank.....	95
Appendix E- The U/C Valve.....	97
Fig. 35: Small Hybrid System Using the U/C Valve.....	98
Appendix F- Tooling.....	99
Fig 36: Nozzle Alignment Tool.....	99
Fig 37: Simplified Strong-back for Assembly.....	99
Fig 38: Drill Press Adaptation to Inert Mixing System.....	100
Fig 39: SORAC Casting Cup Method for Pouring Hybrid Grains.....	101

Fig 40: SORAC Filament Winder.....	102
Fig 41: Drilling/Tapping Station.....	102
Appendix G-Tank General preparation	103
Appendix H – The History of Hybrid Research	105
Fig 42: Hybrid Research Time Line	105
Appendix I- Resources.....	107
Afterthoughts- Revision A Additions	109
Hybrid Motor using Gelled Oxidizer.....	109
Friends of Amateur Rocketry.....	109
Fig 44: This Blockhouse is being constructed at the Mojave Site of FAR.....	110
Manned Spaceplane Hybrid Motor Design.....	110
Fig 45: Soars manned Spaceplane Motor Head End	111
Steve Zwaska’s 4.0 Inch Hybrid Vehicle	111
Fig 46: 4 inch Overall Arrangement	112
Fig 47: 4 inch Grain Configuration.....	112
Fig 48: 4 inch Motor General Arrangement	113
HAH-203-2	115
Fig 49: September 2003 Flight to 27,000 feet	115
MicroHybrids	117
Rattworks Experimental Injectors.....	119
SpaceShip One Analysis	129
INDEX	131
